Engineering Manager | Product Manager | AI | Builder | Founder

PROFESSIONAL SUMMARY

Results-driven Engineering Manager with 7+ years of experience building and scaling AI-driven healthcare platforms and mobile products. Proven track record leading cross-functional engineering teams, driving 0-to-1 product development, and delivering reliable, high-performance systems. Ex-Founder with hands-on expertise in Android development, agentic system design, backend architecture, and engineering team leadership. Skilled at translating complex workflows into scalable technology solutions.

PROFESSIONAL EXPERIENCE

Engineering Manager | Product Manager

DoctusTech | *May 2025 – Present*

- Lead engineering for DoctusTech's agentic healthcare platform across AI, backend, frontend, and mobile verticals.
- Established engineering processes, sprint systems, and delivery pipelines, improving team velocity and reducing cycle time.
- Partner with clinical, product, and AI teams to translate healthcare workflows into scalable agentic automations.
- Mentor engineers and shape engineering culture to build a high-ownership, high-accountability team environment.
- Drive platform reliability, performance improvements, and expansion of AI-driven healthcare capabilities.

Team Lead

DoctusTech | *May 2023 – May 2025*

- Led full engineering and product lifecycle for DoctusTech's clinical education division.
- Built mobile learning products used by clinicians for HCC training and assessments.
- Drove feature development, analytics integration, and mobile architecture revamp.
- Coordinated across design, content, and leadership to scale platform reach and user engagement.
- Achieved significant improvements in platform reliability and user retention metrics.

Senior Android Developer

DoctusTech | *May 2022 – Jun 2023*

- Developed and maintained core Android features for clinical mobile applications.
- Applied Coroutines, MVVM architecture, and Android Jetpack libraries for scalable development.
- Collaborated with cross-functional teams to deliver high-quality, reliable app releases.

Android Developer

DoctusTech | *Sep 2021 – May 2022*

- Built and maintained Android features across multiple healthcare app verticals.
- Implemented unit testing frameworks improving code coverage and release quality.
- Contributed to performance optimizations and bug resolution across the mobile codebase.

Founder & CEO

PublicPosts | *Bengaluru, India* | *Feb 2019 – Sep 2021*

- Founded and built PublicPosts, a hyperlocal community-driven social media platform with 4,000+ local hubs.
- Led all product, engineering, marketing, and business strategy functions across mobile and web.
- Developed a Marketplace featuring 200+ product categories with real-time features including messaging, service providers, blood volunteering, COVID-19 tools, dynamic referrals, and trending topics.
- Managed user acquisition and growth experiments, building zero-to-one product and business foundations.

- Co-founded Just For You (2018-2019): a real-time GPS-based service provider app; led a team of 4 through geo-location feature development and product scaling.

SKILLS

Engineering & Product Leadership:

Engineering Management, Agile/Scrum, Sprint Planning, OKR Alignment, Roadmap Planning, Feature Prioritization, User Story Mapping, Product Analytics, 0-to-1 Product Development

AI & Agentic Systems:

Agentic Platform Development, LLM Integration, Healthcare Workflow Automation, Prompt Engineering, Multi-agent Orchestration, RAG Pipelines, AI Feature Design

Development:

Android, Kotlin, Java, Swift, KMM, Jetpack Compose, MVVM, Clean Architecture, Coroutines, REST APIs, Node.js, Firebase, GCP, AWS, PostgreSQL, MongoDB, Redis, OAuth 2.0, JWT, React.js, HTML5, CSS3, JavaScript, TypeScript, App Store & Play Store Deployment

EDUCATION

Bachelor of Engineering, Computer Science

BIT | 2018
